

A person stands on a grassy cliff edge, looking out over a vast, deep fjord. The water is a deep blue, and the surrounding mountains are rugged and forested. The sky is overcast with soft, grey clouds. The overall mood is serene and expansive, suggesting a journey or exploration.

Your IT portfolio has its own true north.
We'll get you there.

Radiant delivers software, infrastructure and data solutions that solve challenging business problems. With a deep bench of talent, expertise in the latest technologies, and over two decades of experience, we can help you navigate the road to digital transformation.

We pack agility and value into your project.

Legacy System Modernization

We can provide resources and expertise to guide your journey towards improving legacy system performance, reducing maintenance expenses, addressing security issues, or improving user experience.

Custom Development & Integration

Whether you're developing a new application, consolidating systems, developing new features, or all of the above, we bring an agile mindset and strong technical skill to help you achieve your goals.

Robotic Process Automation

We have unique experience in Robotic Process Automation. Leveraging common platforms and tools we can help you navigate towards efficiency, cost savings and quality improvement.

Data Science, Engineering & Analytics

The endeavor to turn data to insight is not for the meek. We're there with you at each step, offering services in data architecture, engineering, AI/ML and analytics that can give your company an edge.

Cloud & Infrastructure Transformation

Cloud transformation enables unparalleled scalability and flexibility, allowing businesses to adapt swiftly to changing demands. We can help your company realize the promise of cloud.

Product Development

If you're ready to explore the wilds of new product development, we'll bring the map. Our team has built and scaled market-changing products in enterprise and the consumer sectors.

Shifting terrain requires agility. We're made of it.

Applications, Data and Infrastructure Services

- Legacy System Modernization
- Custom Software Development and Integration
- Robotic Process Automation
- Data Science, Engineering, and Analytics
- Cloud and Infrastructure Transformation
- Platform and Product Development

Radiant unlocks the power of technology to deliver measurable business value.

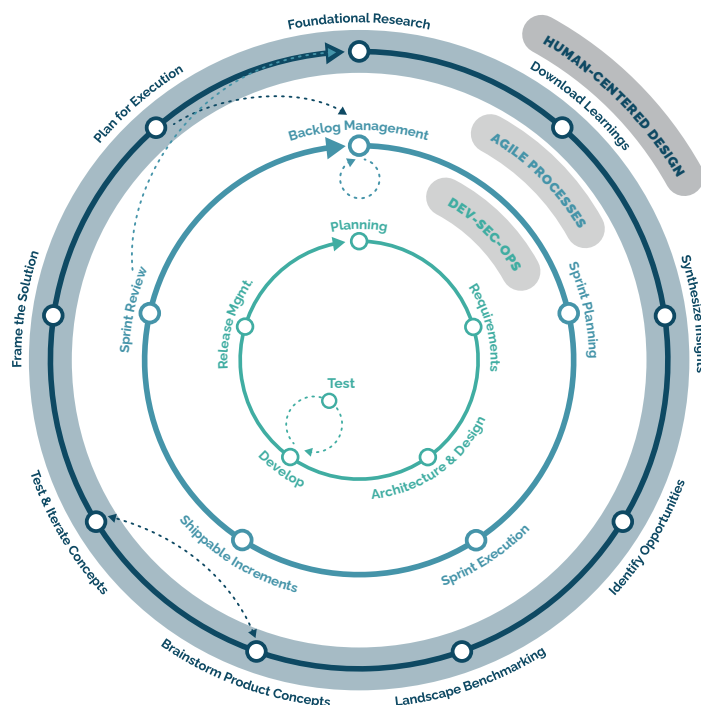

Our Approach in Practice

Client Challenge

A leading telecommunications provider was struggling with a legacy ticketing application that was unable to meet daily resource demands. This challenge created significant reputation risk and operational churn, as application availability diminished customer support capability.

Our Solution

Leveraging Radiant's deep expertise in application modernization, we helped our client design and deliver a cloud-native application stack that increased system capacity by over 500%. Our architectural approach created a more resilient, responsive and scalable solution, directly improving our client's ability to meet customer SLAs.

We place business and user needs at the center of our iterative technology development processes, seamlessly merging human-centered design, transparent agile delivery, and DevSecOps processes.

Digital destinations evolve. We're fueled for the journey.
