Why Radiant?

Radiant is committed to your success. We take a strategic approach to information technology, ensuring that our clients' IT assets are continuously aligned with their business goals. We actively engage with our clients to find innovative and sustainable solutions that make their businesses more efficient and profitable. We have domain experience across multiple industries, including the federal government, oil and gas, financial services, technology, health, telecom, manufacturing, and more. Our emphasis on rigorous screening, ongoing skills training, and methodical knowledge management ensures that we recruit and retain top talent. We provide centres of excellence, encouraging our staff to stay current on the latest tools and technologies. This commitment allows us to help our customers evolve along with technology and create and test innovative proof of concepts.
